

TRUMP TRIUMPH *TRUMPETS* TERRORISTS' TOTAL TROUNCING

Let us on,/And publish

The occasion of our arms./

*The commonwealth is sick of their own choice...*1.3 Henry IV, part II

Nothing withstood Trump triumph juggernaut- American peoples' protest's Tsunami- not The New York Times meddling, not the Obama doomsdaying, not the Hillary wolf crying, not the uninformed Canadian wishing, not the Muslim shedding of crocodile tears and that phony theaterics on loving and dying for America.

Peoples' will came through- the *vox populi*...

The one fellah had come and made needless wars. The one before had been 's' predator of sorts, using some job economics for his cover up. The next orated like hellfire, yet created more enemies than ever before. This business tycoon, the Donald Trump, true to his salt, was business like. He promised no moons. He dared to hold the terror lion by its mane! He showed the troubled conscience American nation the needed mirror. He spoke the earthly farmer truth- shooting simple, straight and into bull's eye- each time. WE THE PEOPLE roared approval.

Now the deed stands done, now all over all the election din. Silence descends. Time to relax, sit back and ruminate on *what next?* Now is time to see what the hope's hero does to make America great. Will he create jobs, alleviate poverty, console and comfort the downtrodden, the have nots? Will he make American street safe from needless guns and the shootings? Will he make Americans relearn all over again the virtue of selflessness, the same selfless service doing which they saved the rest world from Nazi menace? Will he bring about equality, long but never kept promise? Will he cleanse the country of Islam weed? Islam is bad; it just is too bad. Islam dehumanizes human beings leaving them sick with ignorance of the world even if they are bursting at the seams with their 7th century primitive Koran thought. Islam shuts minds to ingress of new knowledge; Islam doesn't know physics; it would not let its faithful grow up to demands of advancing time; it punishes Apostasy thus denying human beings their freedom to choose. Besides, Islam would not leave others in peace. Islam just doesn't know how to appreciate *live and let live!*

The communists wanted to paint the world red. Islam will paint the world green. What greens, these men and women! Their willful ignorance appalls progressive modern mindset.

America is a land of freedom. That is a damn big privilege. America is, as they say, land of opportunity. That is damn good start for any aspirant. And America is *avant garde* with technology, an ocean ever filling up even as it keeps boiling over. Every other folk on earth has drawn upon this ocean for all sorts of material benefits. Think Google! Think Microsoft! Internet! And all so much else as of science and technology fruition. Any citizen living in such a 'salubrious' environment must be open minded, cosmopolitan, awake to the fast pace of human development and to the need for well-aimed advancement of civilization.

Islam with its medieval mindset is fetters, a drag in progress's feet. President Trump will want to restore American confidence and refurbish its healing touch capability as of defending freedom and liberty and democracy everywhere on earth.

American Revolution!

That is the name of the game. That spirit, long smoldering on ash heaps of flagging Americanism, must reflare and resoar into its Washington heights, Emerson skies and go and touch Lincoln stars- what to say of Thoreau and the Whitman 'pars'!

So comes Trump America to stand at the threshold of speeding up 21st century. What an augury!

President Trump, as mandated by American people, needs to go from day one and the very first hour of his Presidency after doing 'the job'. Any hurdle in the way, any malicious meddling, the liberals' romantic spanners in the works, most of all those by Islamists on American soil must be nipped in the bud.

People who hate America inside their minds and within the four walls of their homes are America's moles, dangerous internal enemies, hydras budding forth polyps upon insidious polyps. The snowballing Fifth Column phalanxes. America beware! President Trump! Beware!

What a start it would be if President Trump joined hands with President Putin of Russia in destructing Islam Caliphate such as shouldn't allow the monster to raise its head in next thousand years. Better would be to crush the cobra head altogether.

Similarly, President Trump could join hands with Prime Minister Modi in helping the great Indian 'action hero' as he goes about restructuring the Indian Subcontinent: it is but undoing the harm done to Indian Civilization by its own traitors hand in glove with British Empire during colonial times. Impenitent Islam is India's big time culprit too. As we see, on

Islam count, America, Russia and India are one; perfect confluence of national interests, and to mutual advantage of all.

World shaking tasks of immense seminal significance whose completion would ensure the reign of reason and right on earth after all-and for one and all. Tending national interest is all right, but as important it is to not lose sight of the international element in the *Weltgeschehen*, for earth is one- *vasudhaiv kutumbhakam!* I can well imagine the positive effects of Indian Subcontinent on one hand- human world's spiritual resource- Russia and United States of America, engines of material development, on the other working in unison- democracies that these are- to help reorder human civilization to natural laws of existence. Statesmen would then discover, for instance, Afghanistan problem resolving on its own. So too would Kashmir problem be gone. Pakistan dead, the Taliban would dry up. Similarly, Arabs, giving up their Islam conditioned useless animosity, would learn to live in peace with Israel, people of high intelligence quotient who could teach Arabs many a thing of science. What use is bloodletting all the time?

Freedom, for example, is of paramount importance. All three countries are well qualified in the freedom matter. China should be removed from Security Council membership until such time as it has learned to be democratic which it would most demonstrate by freeing Tibet and letting Dalai Lama in into his Tibet home. The Tibetan people should not languish in 21st century, held hostage to hopeless communism while they have their far better Buddhism practices in sensible living- and in this forced limbo.

Freedom is so important that its absence or its dilution annuls all other effort at good living. China is a case in point. It is no good future promise to human civilization because they have little use for freedom as we know it in democracies worldwide. The Chinese case is at once crass; they oppress their own people and they subjugate Tibetans in this age and day. They flout international law, another reason to take away from them their undeserved Veto privilege. They have power, yes, but little all-round wisdom. They have themselves to blame for sidelining their own Dao.

This sets the stage for Trump Trick 'Trial' in the history's mill.

President Trump!

January Inauguration fixture still gives you a long breather. Collect yourself; come face to face with *Weltgeist* as well as your own incredible spirit. Infuse it some- even a touch should do- with Vivekanand Vedant. If you can do that magic, then you may hope to lift the human condition out of its current lows up into otherworldly horizons, hosts to new dawns breaking, bringing along ah! such yearned betterment of human condition as has eluded all heroes in the past. For too long now humanity has been battered by ignorant humans' *ignorant armies fighting by the night.*

President Trump!
